✓ Set Appointment Times

We will provide a specific date and time for appointments. No waiting around between 9am to 5pm.

✓ After Assessment Support

Once you have received your report, our team are on hand to assist with any queries, provide support and guide you through the findings.

Helping you to manage and reduce the risk of fire

Since October 2006, Fire Risk Assessments have been a legal requirement under the Regulatory Reform (Fire Safety) Order 2005. Safe I.S. is here to guide you through this process to ensure you can comply with this legislation in a timely and efficient manner utilising our team of experienced and qualified assessors.

Our expert assessors create reports written to PAS79 (the Publicly Available Specification for Fire Risk Assessments) to ensure the report is both detailed but simple to follow.

What is a Fire Risk Assessment?

In a way "It does what it says on the tin" It is an assessment of the Fire Risk within a specific building/premises. This assessment is designed to provide the Responsible Person with a clear and concise overview of any potential fire risk and advise them of the steps they can take to reduce it.

For example, there may be an electrical risk of fire in a certain area, therefore an assessor would highlight this and may recommend the installation of a suitable firefighting appliance like a CO2 fire extinguisher which is safe for use on live electrical equipment and provides a means to tackle the fire risk in this area in its early stages.

What are the benefits of a Fire Risk Assessment?

Prevention is always better than cure and this is the remit of a Fire Risk Assessment. Our team of qualified assessors are meticulous and will often spot items that can go unnoticed on a daily basis which increase the risk of fire in your premises.

A professional Fire Risk Assessment will enable you to understand the potential fire risk in your property and therefore act accordingly to reduce that risk.

Fires can be devastating to any type of property or business, so our assessment reports are designed to offer step by step guidance on each element, enabling you to take the necessary action where needed.
