

Fire Warden / Marshal Training

Engaging, third party accredited courses provided by experts

✓ Third Party Accredited Training

Our course has been meticulously reviewed by the Institution of Fire Engineers (IFE) and approved as one of their recognised training courses. Every certificate of completion is stamped with the IFE seal of approval.

✓ Expert Trainers

This is not your standard "PowerPoint Presentation". Our trainers use a mixture of learning models to ensure attendees get the most from their time and have an engaging session. Attendees benefit from the face-to-face nature of our training where questions can be asked, discussed and answered by our expert trainers.

✓ Certification

An IFE stamped certificate of completion is issued to each attendee following successful completion of the course. Certificates are valid for 3 years from the date of the training.

Interactive "Class Room Style" training to boost competence, knowledge and confidence

Our comprehensive, third party approved, Fire Warden/Marshal Training course is designed to equip attendees with the knowledge and skills needed to become a competent Fire Warden (Also known as Marshal).

Experienced and friendly course trainers visit your property (Now also available online) to teach your duties as detailed in the latest Fire Safety Legislation. A mix of classroom-based and practical training (where available) allows course attendees to relate to real-life scenarios.

How is the course structured?

Our interactive course typically lasts between 2.5 to 3 hours and takes the form of an informative presentation, question and answers throughout, detailed handouts complete with a practical Fire Extinguisher demonstration with Live Fire Simulator.

Our trainers will provide their own computer and projector, we simply need an area where they can set up their equipment and all attendees can sit comfortably.

What subjects are covered by the course?

- ✓ Legal responsibility under the Regulatory Reform (Fire Safety) Order 2005
- ✓ Live Fire Simulator and use of Fire Extinguishers
- ✓ Fire safety checklists
- ✓ Electrical safety in the workplace
- ✓ Kitchen fire safety
- ✓ Evacuation strategies
- ✓ Grab bags and their importance
- ✓ COSHH/DSEAR regulations
- ✓ Comprised escape route strategies including safe rooms
- ✓ Fire prevention covering relevant aspects related to your business and premises
- ✓ Real life case studies
- ✓ The "Fire Triangle" and the spread of fire
- ✓ Compartmentation in properties
- ✓ Improving fire safety
- ✓ Fire service/brigade liaison and requirements
- ✓ PEEPs (Personal Emergency Evacuation Plans)

Fire Warden / Marshal Training

Engaging, third party accredited courses provided by experts

Third Party Accredited by the Institution of Fire Engineers

Our course has been independently assessed by the Institution of Fire Engineers (IFE) and approved as a Recognised Training Course.

The IFE reviews specific training courses to determine if they meet the high standards and level of detail necessary to obtain this accreditation. Utilising their knowledge of professional standards, close involvement with industry, education and regulators means it is uniquely placed to independently assess and recognise training providers and courses only offering this status to reviewed and audited training material and trainers.

Our course allows Responsible Persons to meet their legal requirement under the Regulatory Reform (Fire Safety) Order 2005 that all employers / responsible persons ensure that all employees are provided with adequate fire safety training.

Tackle real fires using our controlled Fire Simulator

Included as part of our course, we will deploy our demonstration-controlled fire simulator and fire extinguishers. This enables the attendees to gain valuable hands-on experience and build confidence using a genuine fire extinguisher, the functions for safe use and handling (e.g. Co2, Water etc) and the methods required for tackling different fire types.

This can offer "real life" experience so the attendees can be confident in their skill and knowledge should the need ever arise to use an extinguisher.

Where a fire simulator can not be used (For example due to lack of space or on online courses) this will be replaced with a presentation covering the same information. As the same content will still be covered this does not affect the certification provided, it is the same whether the fire simulator is used or not.

Our course is also available online

Since the first outbreak of COVID-19, we have suitably adapted our courses so that they can also be delivered online too.

Our online courses are in the same format and cover the same information as our on-site courses. They are a presented course by knowledgeable and experienced trainers, allowing you to ask questions and discuss matters raised ensuring you have the time and expertise provided to learn the information required.
